National Energy Efficiency Conference 2018

Better cities, stronger industry, cheaper energy

Monday 19 November	
8:00 am	Registration and coffee (served in Exhibition Hall)
8.45am	Welcome from Energy Efficiency Council President Tony Arnel , President, Energy Efficiency Council
8.55am	Ministerial address
9.15am	Lessons from Germany's Energy Transformation Professor Peter Hennicke , Former President, Wuppertal Institute Germany is a manufacturing powerhouse and world leader in energy efficiency and clean energy. Prof Hennicke, the father of Germany's energy transformation, will discuss key lessons to help Australia address its energy crisis.
10.30 am	Morning Tea (served in Exhibition Hall)
11:00 am	Welcome from the International Energy Agency's Energy in Buildings and Communities Programme Chair Takao Sawachi , Director, Building Research Institute, Japan
11:10 am	What will drive the buildings revolution? Buildings are being transformed by new goals to boost the health of occupants, lower emissions and reduce maintenance costs. This session will bring together global and local leaders to look at the drivers that will change our cities.
12:30 pm	Lunch (served in Exhibition Hall)

PRESENTED BY

IN COLLABORATION WITH

	PRECINCT STREAM	BUILDING STREAM	INDUSTRIAL STREAM
1.30 pm	<p>Higher education – leading the way to an efficient future</p> <p>This session will look at how campuses are radically improving their efficiency to dramatically cut bills and teach the next generation of urban designers.</p>	<p>Maximising thermal comfort and air quality</p> <p>Experts will look at the design, technologies and policies we need to deliver healthy, productive buildings.</p>	<p>Big trends in industrial energy management</p> <p>Learn from leaders about industrial energy management growing focus on onsite renewables, PPAs and demand response.</p>
2:30pm	<p>Precinct and microgrid approaches to deliver huge energy savings</p> <p>Experts will examine how approaches that incorporate multiple buildings can deliver huge cuts in energy bills.</p>	<p>The next generation building modelling and rating</p> <p>Learn how better measurement and modelling tools are about to revolutionise the way that we design and manage buildings.</p>	<p>Engaging the big end of town</p> <p>Learn straight from the horse's mouth – what do service providers and policy makers need to know about what makes big users tick?</p>
3.30 pm	Afternoon Tea (served in Exhibition Hall)		
4:00 pm	The Hon Josh Frydenberg MP Federal Minister for Environment and Energy		
4.30pm	<p>Cities of the Future – buildings and beyond</p> <p>Cities are far more than just buildings – this session will bring together local and global leaders to look at trends in urban planning, transport, public lighting and infrastructure and what they mean for our cities.</p>		
5.30 pm	Networking Drinks (served in Exhibition Hall)		
6.00pm	Energy Efficiency Council AGM (Members only)		
7.30 pm	Gala Dinner & National Energy Efficiency Awards 2018		

Tuesday 20 November			
8.00 am	Registration and Coffee (served in Exhibition Hall)		
9.00 am	So Hot Right Now! How to make efficiency desirable While engineers, managers and policy makers have a critical role in delivering energy efficiency, we're not always experts in communication. This session will bring together leaders in marketing, music and the arts to look at how we can get politicians, businesses and households excited about energy efficiency.		
10.30 am	Morning Tea (served in Exhibition Hall)		
11.00 am	How will energy management transform energy markets? Our energy markets are transforming rapidly, as energy management becomes a key tool to keep the lights on and energy affordable. This session will bring together key regulators and experts on the ways that demand response and energy efficiency are going to be integrated into energy markets.		
12.30pm	Lunch (served in Exhibition Hall)		
1.30pm	Energy Efficiency Schemes and Incentives	Developing energy management skills	Upgrading public buildings & infrastructure
	Get the latest insights into the current state of play and future of Australia's energy efficiency schemes and incentive programs.	For a major revolution in Australia's energy efficiency, who do we need to train and what skills do they need?	What are the trends in upgrading public buildings and infrastructure and how do we accelerate them?
3.00 pm	Afternoon tea (served in Exhibition Hall)		
3.30pm	The Hon Mark Butler MP Federal Shadow Minister for Climate Change and Energy		
4.00pm	Closing Comments Tony Arnel , President, Energy Efficiency Council		
4.10pm	Networking drinks (served in Exhibition Hall)		
5.00pm	Conference close
