

NATIONAL ENERGY EFFICIENCY AWARDS 2023

Best commercial building energy management project

The judging panel will consider performance, leadership and innovation for commercial building energy efficiency projects. Applicants do not need to provide information against all of the following criteria, but providing relevant information against a number of criteria will increase the likelihood of receiving an award.

Performance

Percentage reduction in energy use	The percentage reduction in energy use, measured at the site level or across multiple buildings. In order to standardise between fuel types, applicants should submit information in percentage reduction and gigajoules (GJ), although they can provide supplementary information in greenhouse gas emissions.
Demand management	An alternative or complementary performance criterion for retrofits is a reduction in demand, either measured as a reduction in peak demand or scale of demand response. This figure should be provided in watts (e.g. MW) or a similar metric, but factors such as the speed of response will also be considered.
Overall building performance	Building performance will also be considered relative to peers. Where a NABERS rating or projected NABERS rating is available this should be submitted. This is the major performance criteria for a new build and secondary criteria for retrofits.
Total savings	Total scale of energy savings (retrofits) or relative to industry average benchmark (new build), ideally measured in gigajoules (GJ) as a standardised unit across fuel types.
Co-benefits	Describe (and quantify if possible) any <u>major</u> co-benefits associated with the project, such as performance improvement or savings in staff time and materials.
Return on investment	Where an ROI or simple payback period is provided, nominees are asked to specify whether the ROI/payback is energy-only or inclusive of co-benefits.

Leadership

Catalysing change	<p>The judging panel will consider how much a project has catalysed change in the sector, either by demonstrating a new technology, demonstrating energy efficiency in an unusual type of building or raising the benchmark for energy efficiency levels.</p> <p>A project may also catalyse change by demonstrating the benefits of an integrated model of retrofit delivery, with the supplier working with the client through the entire project (encompassing energy assessments or audits, business case development, design, install, commissioning and measurement and verification).</p> <p>The panel will also consider the extent to which the project is a 'leading' project, the effort by the nominees in overcoming barriers and the effort by the nominees or partners to promote the project.</p>
--------------------------	---

Innovation

New technology	The judging panel will consider the application of a novel technology, or novel application of an existing technology.
-----------------------	--

Notes

1. Projects should have been completed OR the results confirmed between 1 October 2019 and the date the project is nominated.
2. The definition of 'Commercial' includes hotels, hospitals, aged care, education, government buildings, retail, data centres, and public buildings used for commercial activities.
3. Commercial projects can include energy saving measures, cogeneration and other forms of distributed generation.
4. Performance will be judged at the 'site' or 'entity' level. Nominations might include, by way of example:
 - Projects that cover an entire precinct/campus;
 - Projects that cover a whole building;
 - Projects that cover a tenancy in the case where the work was being performed for a single tenant; or
 - Projects that cover a discrete part of a building (e.g. a swimming pool).

Performance will not be judged just by the performance of an isolated component. For example, if a lighting retrofit reduced total energy consumption at a site by 20%, but energy consumption for lighting by 50%, the judges would consider the project based on a 20% energy saving.

Terms and conditions of entry

Entry process

1. To enter the National Energy Efficiency Awards (NEEA), you must comply with these terms and conditions of entry.
2. Entries will only be accepted via the official entry form and in line with the guidelines and word counts provided.
3. You may only enter a project or initiative in one award category.
4. The Energy Efficiency Council (EEC) reserves the right to reallocate a nomination to an alternate category should the judging panel deem it more relevant to the nomination.
5. If you have more than one project or initiative, you may enter each project or initiative once into separate award categories. You must complete a new nomination form for each nomination.
6. You must complete the entry form fully addressing the judging criteria provided in this document.
7. Entries (including supporting information) close at **5PM AEDT on Wednesday 15 March 2023.**
8. No late submissions will be accepted.
9. Claims made in your entry must be true and correct. The EEC reserves the right to declare your entry ineligible if, in the reasonable opinion of the EEC, the information provided in your entry is deficient, false or misleading in any way.
10. You may self-nominate for any award with the exception of the *Young Energy Efficiency Professional* and *Energy Efficiency Champion* categories where nominations must be received from a third party.
11. If you nominate a third party, the nominated party must, on request, provide written evidence that they accept these terms and conditions of entry.
12. Entrants agree to attend or provide representation at the NEEA Gala Dinner and other relevant publicity activities if they are short-listed as a finalist.
13. Entrants must declare any perceived conflicts of interest in their entry.

Privacy and intellectual property

14. By submitting an application, the entrant:

- a) Warrants that the entry and the project or initiative which is the subject of the entry do not infringe on the copyrights, trademarks, moral rights, rights of privacy or publicity or intellectual property rights of any person or entity, and that no other person or entity has any right, title, claim or interest in the entry or the project or initiative which is the subject of the entry;
- b) Grants an irrevocable, perpetual, world-wide non-exclusive license to the EEC to reproduce, distribute, display, adapt and modify information contained in your entry (except for confidential information identified by the entrant in accordance with clause 16) and any intellectual property subsisting in it in connection with the NEEA and to promote the NEEA in any media now or hereafter known, including but not limited to web content, advertising, publications and on-screen content;
- c) Acknowledges that entries (including supporting evidence provided for the purposes of a NEEA nomination) become the property of the EEC and will not be returned;
- d) Grants the EEC an unrestricted right to use all statements made in connection with the NEEA and images of the entrant or which resemble the entrant in any reasonable manner, and to permit third parties to do so, at the EEC's sole discretion; and
- e) Acknowledges that the EEC will not be required to pay any additional consideration or seek any additional approval in connection with the uses described in this clause (except where prohibited by law).

15. Subject to clause 16, information contained within the entries of NEEA winners and finalists will be made public. It is a condition of entry that you give permission to publish your entry including your name and any photograph of you provided as part of your entry. This information may be used by the EEC for promotional purposes.

16. Entrants must indicate any confidential information (including commercial and personal information) provided in their application that is not intended for public release. The EEC will not publish confidential information identified in accordance with this clause.

17. The EEC will recognise and promote award winners, including with media partners. Entrants should be prepared to allow case studies of their entries to be prepared by the EEC, and must provide input and information for those case studies as reasonably required. Case studies may be made public, except for confidential information (including photographs) identified in accordance with clause 16.

18. By entering the NEEA, you consent to photographs of you being taken at the Gala Dinner and Awards Ceremony and other relevant publicity activities, and to the use of such photographs in promotional material published by the EEC, including on websites, social media platforms and printed materials.

Judging panel

19. The decisions of the judging panel are final and no further correspondence regarding the panels' decisions will be entered into.

20. The panel of judges consists of experts in a range of fields. The panel will score nominations against the judging criteria for each award category and supporting information supplied by the applicant.

21. The judging panel may nominate entries for any award category and must declare any perceived conflicts of interest if they do so.

22. The judging panel may elect to present more than one award per category to reflect outstanding achievement.

23. The judging panel may recommend to the EEC that a nomination be reallocated to an alternate category if it deems the alternate category more relevant to the application.
